How the Forever Character Oracle chooses

The mathematics behind the class, specialization and confidence figures · version 1.11.0 · algorithm 1.9.0 · November 4, 2026

This document explains every calculation that turns your answers into a recommendation, and every number behind it. Each table is computed from the quiz's live configuration and from seeded simulations, so it can be regenerated whenever the weights change (`python tools/build_math_pdf.py`). Scores are **relative compatibility indicators** on a scale with no fixed maximum. The only probabilities in this document are the ones in the confidence model (section 8), which are exact *within that model* and rest on assumptions stated there. The quiz is playstyle lore with no personality science behind it: studies of WoW players found little or no link between personality and class choice.

1 The pipeline in one page

Every question has a finite set of **responses** (an answer, a pair, an ordering, a split of points, a rating). Each response carries weights for the nine classes, the twelve personality traits and, for some answers, individual specializations. The weights of the response you give are added up over the questions, after subtracting what an average response would have contributed, so that a question can never favour a class just by appearing in the quiz.

$$\text{answers} \;\rightarrow\; \text{response weights} \;\rightarrow\; \Delta \text{ (minus the average)} \;\rightarrow\; S_c,\; T_t \;\rightarrow\; P_s \;\rightarrow\; \text{result}$$

Step	What is computed	Section
1	the response you gave becomes a weight vector (classes, traits, specializations)	2
2	the average weight over all possible responses is subtracted	3
3	class scores S_c and trait scores T_t are the sums of those differences over the questions	4
4	the class with the largest S_c wins; ties go to a fixed class order	4
5	inside the winning class, specialization scores P_s combine the trait scores with the specialization's profile and any direct weights; the largest wins	5
6	the gap between the top two classes becomes a label (Strong lean, Clear lean, Close call)	6
7	optionally, a probabilistic model reads the same numbers as evidence and gives a confidence	8

2 Questions and responses

A question's *answers* (up to four) carry the weights. What you submit is a *response*; its weights are a fixed linear combination of its answers' weights, with a coefficient for each answer:

$$w_q(r,k) = \sum_a \gamma_q(r,a)\; w_{q,a}(k) \qquad k \in \{\text{classes},\; \text{traits},\; \text{specializations}\}$$

Type	You do	Responses R	Coefficients γ(r, a)	Questions
choice	pick one answer	number of answers (2 to 4)	1 for the chosen answer, 0 for the others	63
pick two	choose two of four	6 pairs	1 for each of the two chosen answers	2
ranking	order the four	24 orderings	(3 − place)/2: 1.5, 1, 0.5, 0 from first to last	16
allocation	spend 6 points on four items	84 splits	points / 3 (so six points on one item counts 2)	13
scale	rate 1 to 10	10 ratings	max(s,0) for 'agree', max(−s,0) for 'disagree', s = (rating − 5.5)/4.5	9

Table 1. The five question types, with how many of the 103 questions are of each (the last 73 are asked only in confidence mode). Response counts are exact; the weights a response carries follow from the coefficients.

3 Baseline subtraction

Some classes appear in more answers than others, and a question with many responses would otherwise add more than a short one. So each question's contribution is measured against its own average over **every possible response** (R_q of them):

$$\Delta_q(r,k) = w_q(r,k) - \frac{1}{R_q}\sum_{r'=1}^{R_q} w_q(r',k)$$

Two consequences hold for every question and every class, trait and specialization: the contributions average to zero over the responses (so no question favours anything on average), and, because every answer carries a class weight of 2 + 1 (or another split of 3), the class contributions of any single response add up to zero, so the nine class scores of a complete answer set sum to zero. They are comparisons with the average answer pattern and measure no absolute amount.

Worked example, question 1. “You are permitted to spend one evening in an unfamiliar estate. Which room attracts you first?” Answer A is “The conservatory, filled with plants from distant countries.” Its class weights, the average over the four answers, and what choosing A contributes:

Class	Raw weight of A	Average over A–D	Δ for response A
Druid	2.00	0.50	+1.50
Hunter	1.00	0.25	+0.75
Mage	0.00	0.50	-0.50
Paladin	0.00	0.25	-0.25
Priest	0.00	0.50	-0.50
Rogue	0.00	0.25	-0.25
Shaman	0.00	0.25	-0.25
Warlock	0.00	0.50	-0.50

Table 2. Baseline subtraction for question 1, response A. The contributions of the nine classes add up to 0.00.

Worked example, a point-spending question. Question 9 asks how to divide six hours at a festival; the response “3-0-0-3” spends three points on the first item and three on the last. Its coefficients are 1, 0, 0, 1, so its class weights are the sums of those two answers' weights:

Class	Raw	Average over 84 splits	Δ
Hunter	1.750	1.875	-0.125
Paladin	0.000	0.500	-0.500
Priest	0.000	0.500	-0.500
Rogue	1.250	0.625	+0.625
Shaman	2.000	1.000	+1.000
Warlock	0.000	1.000	-1.000
Warrior	1.000	0.500	+0.500

Table 3. Baseline subtraction for a response with 84 possible values.

4 Class and trait scores, and the winning class

Over the answered questions q, the class score and the trait score are the sums of the differences. The class with the largest score is recommended; scores are compared after rounding to nine decimals, and exact ties fall to the class order below.

$$S_c = \sum_q \Delta_q(r_q, c) \qquad T_t = \sum_q \Delta_q(r_q, t) \qquad c^* = \arg\max_c S_c$$

Tie-break order: Druid, Hunter, Mage, Paladin, Priest, Rogue, Shaman, Warlock, Warrior. Sums are computed exactly (Shewchuk summation), so float noise never decides a result. The browser version of the engine reproduces the Python one to the last digit; a test compares them on every build.

5 Specialization scores

Only the winning class's specializations compete. A specialization s has a **profile**: an ordered list of traits with multipliers (1.5, 1.0 and 0.45 for its primary, secondary and tertiary trait). Its score adds the profile-weighted trait scores to the sum of any **direct specialization weights** that answers carry, scaled by the multiplier M = 5:

$$P_s = \sum_t m_{s,t} T_t \; + \; M \sum_q \Delta_q^{\text{spec}}(r_q, s) \qquad s^* = \arg\max_{s \in c^*} P_s$$

Class	Specialization	Primary trait ×1.5	Secondary ×1.0	Tertiary ×0.45
Druid	Balance	Curiosity	Intuition	Precision
Druid	Feral Combat	Intuition	Spontaneity	Independence
Druid	Restoration	Compassion	Loyalty	Protectiveness
Hunter	Beast Mastery	Loyalty	Intuition	Protectiveness
Hunter	Marksmanship	Precision	Independence	Curiosity
Hunter	Survival	Spontaneity	Ingenuity	Intuition
Mage	Arcane	Curiosity	Precision	Mystery
Mage	Fire	Intensity	Spontaneity	Independence
Mage	Frost	Precision	Protectiveness	Curiosity
Paladin	Holy	Compassion	Conviction	Loyalty
Paladin	Protection	Protectiveness	Conviction	Precision
Paladin	Retribution	Conviction	Intensity	Spontaneity
Priest	Discipline	Precision	Compassion	Curiosity
Priest	Holy	Compassion	Loyalty	Conviction
Priest	Shadow	Mystery	Curiosity	Intensity
Rogue	Assassination	Precision	Mystery	Spontaneity
Rogue	Combat	Spontaneity	Intensity	Independence
Rogue	Subtlety	Ingenuity	Mystery	Precision
Shaman	Elemental Combat	Intensity	Intuition	Curiosity
Shaman	Enhancement	Spontaneity	Conviction	Intensity
Shaman	Restoration	Compassion	Intuition	Loyalty
Warlock	Affliction	Mystery	Precision	Curiosity
Warlock	Demonology	Loyalty	Mystery	Protectiveness
Warlock	Destruction	Intensity	Mystery	Spontaneity
Warrior	Arms	Precision	Conviction	Spontaneity
Warrior	Fury	Intensity	Spontaneity	Independence
Warrior	Protection	Protectiveness	Conviction	Loyalty

Table 4. The 27 specialization profiles. A trait's multiplier is its position's value; direct weights are listed in Appendix B.

195 of the 338 answers carry direct specialization weights. They exist because the trait profiles alone could not make some specializations win at all: with the original sixteen questions, a search found no answers that reached Mage Frost or Rogue Assassination. With M = 5 and the direct weights every specialization can be reached, and the tuning described in section 7 keeps them all reachable, and each winning a healthy share, at every quiz length.

6 Reading the gap: labels and margins

The label shown with a result is a heuristic about the gap G between the top two class scores. The confidence model in section 8 supplies the probabilities.

$$G = S_{(1)} - S_{(2)} \qquad \text{Strong lean: } G \geq \mu_s\sqrt{n/N} \qquad \text{Clear lean: } G \geq \mu_c\sqrt{n/N} \qquad \text{otherwise Close call}$$

Here $\mu_s = 3$ and $\mu_c = 1.25$ are the configured margins for the full 30-question quiz (N = 30), and n is the number of questions actually answered. The gap between the two best classes of random answers grows roughly like √n, so scaling the margins by √(n/N) keeps a short quiz from being called a “close call” merely for being short. A test checks that the share of each label under random answers stays comparable across lengths.

Questions n	Strong lean at G ≥	Clear lean at G ≥
10	1.732	0.722
15	2.121	0.884
20	2.449	1.021
25	2.739	1.141
30	3.000	1.250

Table 5. Margins by number of questions answered.

7 Quiz lengths and balance under random answers

The quiz can be taken at three fixed lengths. The sets of questions are nested (short ⊂ medium ⊂ long), so a short result can be sharpened by answering the next ten questions. A fixed length scores only its own questions; everything else is unchanged.

Length	Questions	choice	scale	pick two	ranking	allocation	Top-two gap at the 25th, 50th, 75th and 90th percentiles
short	10	4	3	1	1	1	0.42, 0.95, 1.76, 2.67
medium	20	8	7	1	2	2	0.56, 1.29, 2.39, 3.66
long	30	14	8	2	3	3	0.69, 1.57, 2.92, 4.46

Table 6. Composition of each length, and the gap G between the top two class scores for 100,000 uniformly random answer sets.

What “equal” means. The quiz is balanced so that, if every response to every question were equally likely, every class would be recommended equally often and every specialization would win a healthy share of its class's results. This is a property of the scoring rules, measured by simulation; it says nothing about how people really answer. With n simulated runs a share p has standard error √(p(1−p)/n):

$$\mathrm{SE}(p) = \sqrt{p(1-p)/n} \qquad \text{e.g.} \quad p = \tfrac{1}{9},\ n = 100{,}000: \quad \mathrm{SE} \approx 0.10\%$$

Class	Short share	Medium share	Long share
Druid	11.17%	11.15%	11.12%
Hunter	10.86%	11.19%	11.13%
Mage	11.42%	11.12%	11.20%
Paladin	11.01%	11.02%	11.06%
Priest	11.42%	11.23%	11.06%
Rogue	11.09%	10.98%	11.05%
Shaman	10.81%	11.16%	11.13%
Warlock	10.94%	11.15%	11.07%
Warrior	11.28%	10.99%	11.17%
Even split	11.11%	11.11%	11.11%

Table 7. How often each class is recommended under uniformly random answers (100,000 runs per length, seed 4242).

Class	Specialization	Short	Medium	Long
Druid	Balance	47.9%	35.3%	32.6%
Druid	Feral Combat	24.1%	38.0%	27.7%
Druid	Restoration	28.1%	26.7%	39.7%
Hunter	Beast Mastery	28.3%	34.6%	35.2%
Hunter	Marksmanship	29.7%	34.1%	34.0%
Hunter	Survival	42.0%	31.4%	30.8%
Mage	Arcane	27.0%	33.7%	34.9%
Mage	Fire	36.6%	36.1%	26.9%
Mage	Frost	36.4%	30.2%	38.2%
Paladin	Holy	44.1%	34.2%	31.0%
Paladin	Protection	31.1%	38.4%	40.1%
Paladin	Retribution	24.7%	27.5%	28.9%
Priest	Discipline	34.5%	44.3%	33.4%
Priest	Holy	28.0%	30.6%	40.9%
Priest	Shadow	37.5%	25.1%	25.7%
Rogue	Assassination	28.5%	28.6%	34.3%
Rogue	Combat	39.7%	43.9%	31.5%
Rogue	Subtlety	31.8%	27.5%	34.2%
Shaman	Elemental Combat	30.9%	34.5%	28.6%
Shaman	Enhancement	39.0%	34.8%	31.4%
Shaman	Restoration	30.1%	30.8%	39.9%
Warlock	Affliction	30.5%	41.9%	37.2%
Warlock	Demonology	31.5%	32.4%	38.9%
Warlock	Destruction	38.0%	25.7%	23.8%
Warrior	Arms	34.1%	43.1%	38.3%
Warrior	Fury	35.3%	30.0%	35.9%
Warrior	Protection	30.7%	27.0%	25.9%

Table 8. The share of its class's recommendations each specialization wins under random answers. The requirement is at least 20%; the lowest values are 24.1% (short), 25.1% (medium) and 23.8% (long).

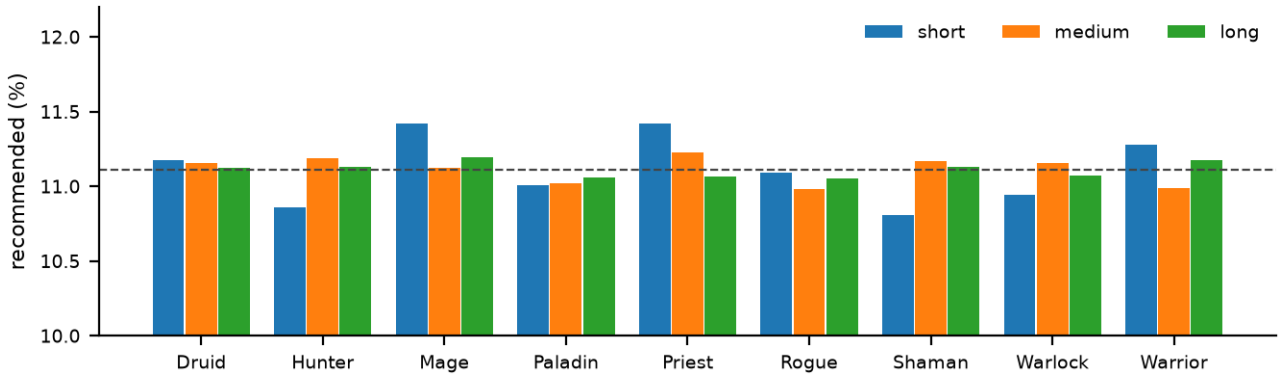

Figure 1. Class shares under random answers; the dashed line is an even 11.11%. Differences of a few tenths of a point are within what the weights can be tuned to and the noise of the simulation.

8 Confidence mode: asking until the Oracle is sure

In confidence mode (the default) the Oracle chooses each next question to learn as much as possible, and stops once it is confident in one specialization: as soon as the model's probability for the recommended specialization reaches 90% (there is no minimum number of questions), and never after more than 30. To say “probability” at all we need a model of how a person of each type answers. The model below is deliberately built from the quiz's own numbers.

8.1 The choice model

There are 27 **types** τ = (class c, specialization s). A person of type τ is assumed to answer question q by a *logit choice*: each response r has a utility equal to what it contributes to that type's scores, and responses are picked with probability proportional to exp(utility).

$$u_q(r \mid \tau) = \lambda_c \, \Delta_q(r, c) + \lambda_s \left(\sum_t m_{s,t} \, \Delta_q(r, t) + M \, \Delta_q^{\text{spec}}(r, s) \right)$$

$$P(r \mid \tau, q) = \frac{e^{\,u_q(r|\tau)}}{\sum_{r'} e^{\,u_q(r'|\tau)}}$$

The sharpness constants say how consistently people answer as their type: $\lambda_c = 1$ and $\lambda_s = 0.35$. Larger values mean answers reveal the type more reliably, so fewer questions are needed. They are assumptions (section 10) that can be changed in the admin settings. With the defaults a simulated respondent needs about 10 questions on average, and 0% of them need all 30.

8.2 The posterior

Questions are answered independently given the type, and every type starts equally likely (1/27). Bayes' rule gives the probability of each type after the answers $r_1 \ldots r_n$:

$$\pi(\tau \mid r_{1:n}) = \frac{\prod_{i=1}^{n} P(r_i \mid \tau, q_i)}{\sum_{\tau'} \prod_{i=1}^{n} P(r_i \mid \tau', q_i)}$$

$$\ln \pi(\tau \mid r_{1:n}) = \lambda_c S_c + \lambda_s P_s - \sum_{i=1}^{n} \ln Z_{q_i}(\tau) + \text{const.} \qquad Z_q(\tau) = \sum_r e^{\,u_q(r|\tau)}$$

The first two terms are the quiz's own class and specialization scores: **the scoring is the evidence, and the model turns it into probabilities**. The normalizers $\ln Z_q(\tau)$ correct for how strongly each type prefers particular responses to a question. A test verifies this identity numerically. Before any answer the uncertainty is the entropy $H = \ln 27 = 3.296$ nats. The confidence is measured for the specialization the scoring currently recommends (class first, then specialization), even when the posterior's own maximum lies elsewhere, so the recommendation shown and the confidence stated always refer to the same specialization. When a new answer changes which specialization leads, the current confidence can fall; section 8.11 explains why the figure the Oracle states never does.

The confidence is not only the probability of that one specialization. A person torn between the three specializations of one class, or between Protection Paladin and Protection Warrior, has given the Oracle real information: it knows the class, or the role, even if it cannot yet name the specialization. So every type earns **credit** toward the confidence in the recommendation ŝ: 1 for ŝ itself, c = 0.5 for another specialization of its class, r = 0.5 for one that shares a role with it (tank, healer, melee damage or ranged damage; Feral Combat counts as both a tank and melee damage), and the larger of the two

when both apply. The raw confidence R is the posterior's expected credit:

$$C = \sum_{\tau} \pi(\tau \mid r_{1:n})\, K(\hat{\tau}, \tau) \qquad K(\hat{\tau}, \tau) = \max\left(1_{\tau = \hat{\tau}},\ c\, 1_{\text{same class}},\ r\, 1_{\text{shared role}}\right)$$

Posterior	Recommended	Its probability	Its class	Its role	Confidence C
A clear specialization	Mage Fire	92.0%	100.0%	100.0%	96.0%
Two tanks, two classes	Paladin Protection	40.0%	40.0%	80.0%	60.0%
One class, three specializations	Mage Frost	40.0%	95.0%	95.0%	67.5%
Three classes, three roles	Paladin Holy	34.0%	34.0%	34.0%	34.0%

Table 9. The confidence for four example posteriors, with c = 0.5 and r = 0.5. The probabilities of the specialization, its class and its role are always reported with the confidence; with c = r = 0 the confidence is just the first of them.

8.3 Choosing the next question

For each unanswered question the Oracle computes the **expected information gain**: how much, on average, the answer would reduce the uncertainty about the type. It asks the question with the largest gain per unit of effort (section 8.12; ties go to the earlier question; gains are compared after rounding to nine decimals).

$$H(\pi) = -\sum_{\tau} \pi(\tau) \ln \pi(\tau) \qquad \mathrm{IG}(q) = H(\pi) - \sum_{r} P(r \mid q)\, H(\pi(\cdot \mid r)) \qquad P(r \mid q) = \sum_{\tau} \pi(\tau)\, P(r \mid \tau, q)$$

Rank	Question	Type	Information gain (nats)	Of the maximum ln 27
1	Q49	choice	0.662	20.1%
2	Q09	allocation	0.591	17.9%
3	Q74	allocation	0.562	17.0%
4	Q26	ranking	0.560	17.0%
5	Q68	allocation	0.556	16.9%
6	Q03	allocation	0.535	16.2%
7	Q13	choice	0.532	16.1%
8	Q01	choice	0.503	15.2%

Table 10. The eight most informative first questions (before any answer). The interface opens with a random personality question (section 8.11); what the Oracle asks next depends on your answers.

8.4 When to stop

$$\text{stop when} \quad n \ge n_{\min} \ \text{ and } \ \tfrac{n}{n+k} R_n \ge \theta \quad \text{or} \quad n \ge n_{\max}, \qquad R_n = \text{confidence after } n \text{ answers} \quad (\text{or a tiebreaker decides, section 8.12})$$

Setting	Symbol	Value	Meaning
Minimum questions	n_{min}	none	never reveal earlier (1 means no minimum)
Maximum questions	n_{max}	30	reveal anyway (a “Close call” is possible)
Confidence threshold	θ	90%	scaled confidence the recommendation must reach
Class sharpness	λ_c	1	how strongly class weights steer an answer
Specialization sharpness	λ_s	0.35	how strongly a profile steers an answer
Credit for the same class	c	0.5	weight of another specialization of the recommended class in the confidence
Credit for a similar role	r	0.5	weight of a specialization sharing a role with the recommended one
Tiebreaker share	m	80%	probability a tiebreaker's finalists must hold before it is asked
Question scaling	k	1	the confidence counts for n / (n + k) after n questions (0 turns it off)
Random opening		on	the first question is drawn at random from the personality questions
Tiebreaker decision	n_t	10	an answered tiebreaker settles the reading from this many questions on (0 turns it off)
Effort of a ranking	e_r	1.5	a ranking counts as this many single choices when choosing the next question
Effort of a six-point split	e_a	2.5	a six-point split counts as this many single choices

Table 11. Confidence-mode settings (admin: Profiles & Settings).

8.5 What to expect: simulated respondents

To see how the procedure behaves, 400 simulated people were generated for each row: a type is drawn uniformly, then they answer every question the Oracle asks as the model says that type would. The numbers follow exactly from the assumptions and measure no real people.

Question order	Mean questions	Median	90th percentile	Reached the limit	Mean stop confidence	Right type at stop
adaptive (information gain)	10.2	10	10	0%	90.5%	98.2%
fixed (quiz order)	21.1	20	30	21%	90.1%	87.0%

Table 12. Adaptive question choice versus asking in quiz order, under the model. Choosing questions by information gain saves several questions.

Because the posterior is exact within the model, the stated confidence should match the credit the recommendation earns among simulated people who stop with that confidence (1 when the specialization is exactly right, c or r when only the class or the role is). It does, up to sampling noise:

Stop confidence	Runs	Mean stated confidence	Credit earned
0.80 to 0.90	48	88.1%	92.7%
0.90 to 0.95	352	90.9%	99.7%

Table 13. Calibration inside the model. This checks the arithmetic. It cannot show that real people answer the way the model does.

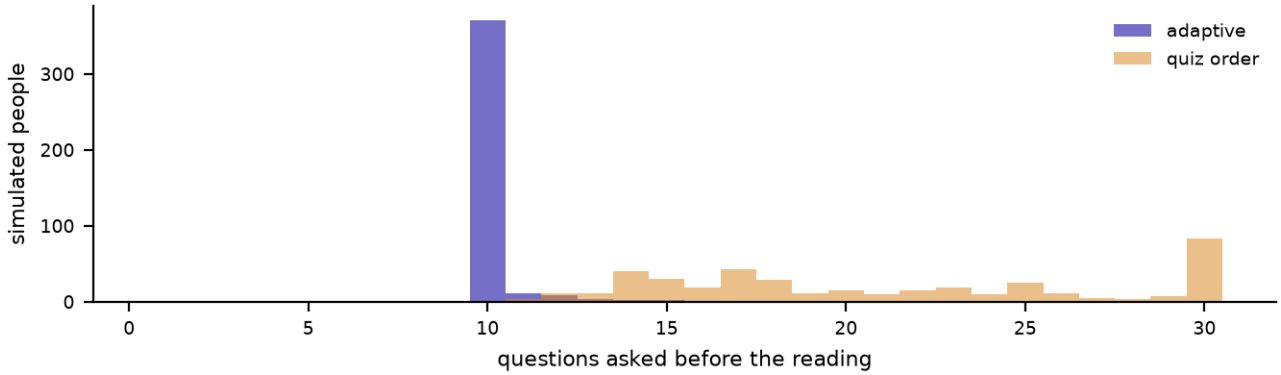

Figure 2. How many questions simulated respondents are asked.

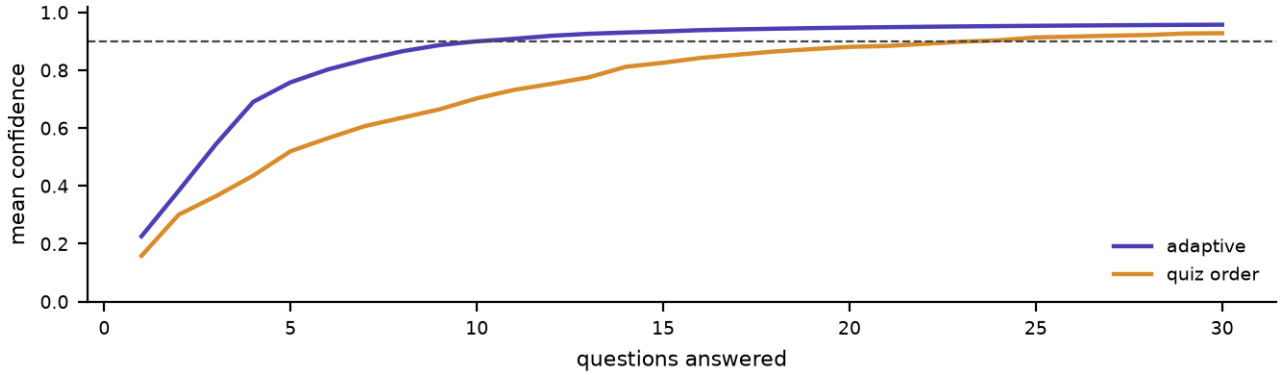

Figure 3. Mean confidence after each question for simulated respondents (the first 30 questions asked, with no stopping). Dashed: the 90% threshold.

After n questions	Uncertainty H, adaptive (nats)	H, quiz order (nats)	Confidence, adaptive	Confidence, quiz order
0	3.296	3.296	3.7%	3.7%
1	2.635	2.790	22.6%	15.8%
3	1.499	2.270	54.5%	36.5%
5	0.659	1.622	75.8%	52.0%
8	0.254	1.208	86.6%	63.6%
10	0.087	1.021	90.0%	70.3%
12	0.023	0.868	91.9%	75.3%
15	0.010	0.642	93.4%	82.6%
20	0.000	0.438	94.7%	88.1%
25	0.000	0.317	95.3%	91.3%
30	0.000	0.273	95.7%	92.8%

Table 14. Average uncertainty and confidence by number of questions, for simulated respondents.

8.6 How much the assumptions matter

The sharpness constant is the one number that is a pure assumption. A larger value assumes answers reveal the type more clearly, so the Oracle needs fewer questions and reaches its threshold more easily; a smaller value assumes noisier answers and asks for more. If real people are noisier than the default assumes, the true accuracy at a stated 90% is lower than 90%.

λ_s (specialization sharpness)	Mean questions	Median	Reached the limit	Mean stop confidence	Right type at stop
0.2	10.8	10	0%	89.5%	96.5%
0.25	10.4	10	0%	90.3%	98.2%
0.3	10.3	10	0%	90.4%	99.5%
0.35 (default)	10.1	10	0%	90.5%	99.8%
0.4	10.2	10	0%	90.6%	99.2%
0.5	10.1	10	0%	90.7%	99.8%

Table 15. Effect of the specialization sharpness (λ_c held at its default), simulated respondents.

Confidence threshold θ	Mean questions	Median	Reached the limit	Mean stop confidence	Right type at stop
80%	6.3	5	0%	83.2%	93.8%
90% (default)	10.2	10	0%	90.5%	99.0%
95%	10.2	10	0%	90.6%	98.5%
99%	10.3	10	0%	90.8%	99.5%

Table 16. The trade between certainty and length: higher thresholds ask more questions and are right more often.

People who answer at random. With no consistent type there is nothing to find: under uniformly random answers the mean stop is 20.1 questions, 22% of such respondents run to the limit of 30, and the final reading has a typical confidence of 88%. The result is then reported with a lower confidence and a weaker label, which is the intended behaviour.

8.7 If people are less consistent than the model assumes

The stated confidence is exact only when people answer the way the model says. To see how far it can mislead, respondents were simulated who are only 70% or 50% as consistent as the Oracle assumes (their sharpness is scaled down; the Oracle's own model is unchanged). The stated confidence then overstates how often the recommendation is right, by an amount that grows as respondents get noisier. At 70% consistency the pool of 103 questions earns 96% credit against 87% for the 30 fixed-quiz questions, but it also stops sooner, so its stated confidence overshoots by -6 points against 2. Raising the confidence threshold in the admin settings narrows the gap at the cost of more questions (Table 16).

Respondents are	Questions asked	Mean questions	Reached the limit	Mean stated confidence	Credit earned	Exact specialization right
100% as consistent as assumed	all 103 questions	10.3	0%	90.5%	99.6%	99.5%
100% as consistent as assumed	the 30 fixed-quiz questions	18.3	24%	89.4%	91.4%	82.8%
70% as consistent as assumed	all 103 questions	11.2	0%	89.9%	95.5%	93.5%
70% as consistent as assumed	the 30 fixed-quiz questions	19.8	29%	89.0%	87.1%	78.2%
50% as consistent as assumed	all 103 questions	13.3	1%	89.3%	85.6%	80.8%
50% as consistent as assumed	the 30 fixed-quiz questions	21.3	35%	88.5%	77.5%	63.0%

Table 17. Stated confidence against actual accuracy when respondents are less consistent than assumed.

8.8 Aiming questions at the leader

An obvious alternative is to aim each question at the current leader, so that the answer either confirms it or sends the Oracle back to look elsewhere. Several such rules were simulated against information gain, with 1,500 respondents per row. The best of the others saved 0.1 questions, which is within the noise of 1,500 simulated respondents per row. Information gain already does this job: once one specialization

leads, nearly all of the remaining uncertainty is about the leader and its closest rivals, so the most informative question is the one that separates them. Early on, when nothing leads yet, a rule that aims at the leader has nothing to aim at.

Rule for the next question	Mean questions	Median	90th percentile	Reached the limit	Right type at stop
Information gain over all 27 types (used)	10.2	10	10	0%	99.4%
Information about whether the leader is right	10.3	10	11	0%	99.3%
Expected probability of the best guess after the answer	10.2	10	10	0%	99.5%
Evidence between the leader and its challengers	10.2	10	10	0%	99.6%
How far the answer can move the leader's probability (confirm or reset)	10.3	10	11	0%	99.3%
Chance this answer reaches the threshold	10.7	10	13	0%	96.1%
Quiz order (for reference)	21.3	20	30	22%	85.7%

Table 18. Ways of choosing the next question, under the model.

8.9 Why the pool has 103 questions

The 30 questions of the fixed quizzes separate classes well and separate the specializations of one class poorly. Measured as the total evidence a pool can give about a pair of types (the sum over questions of the symmetric Kullback-Leibler divergence between how the two types answer, in nats), the weakest pairs are all within one class, and the median within-class pair has 11 nats of evidence against 62 across classes. 20 of the confidence-mode-only questions (two for each class, a role question and a distance question) are aimed at that gap and raise the median within-class pair to 61 nats. A question in the fixed quizzes carries 1.90 nats per pair on average and one of the added ones 1.74, so the gain comes from covering the weak pairs. No weight was made heavier to get there.

Pair of specializations in one class	Evidence from the 30 fixed-quiz questions	Evidence from all 103 questions
Mage Arcane and Mage Frost	3.0	30.2
Paladin Holy and Paladin Protection	7.2	52.4
Priest Discipline and Priest Holy	7.7	59.1
Paladin Protection and Paladin Retribution	7.8	48.4
Rogue Assassination and Rogue Subtlety	8.1	39.3
Druid Balance and Druid Feral Combat	8.7	45.7
Shaman Elemental Combat and Shaman Enhancement	8.8	50.5
Rogue Combat and Rogue Subtlety	9.4	57.3

Table 19. The eight within-class pairs the fixed-quiz questions separate least, before and after the added questions.

The other 24 confidence-mode-only questions are personality questions in which every answer belongs to a different class, so that a person torn among their three leading classes is asked to choose among exactly those three, many times over. The table counts, for each of the 84 trios of classes, the questions that tell all three apart by at least one nat. They carry 1.79 nats per class pair against 1.49 for the fixed-quiz questions: a little more, because each answer names a class no other answer does.

Questions counted	Fewest for a trio	Median	Most
the 30 fixed-quiz questions	1	7	15
the first 50 questions	2	8	17
all 103 questions	4	17	33

Table 20. Questions that separate every class of a trio, by trio.

8.10 Tiebreaker questions: forcing a decision between the finalists

When the Oracle has narrowed a reading to two or three candidates, the useful question is the one that forces a choice among exactly those. There are 29 such **tiebreakers**: 17 for groups of three specializations (the three specializations of each class, and eight groups that share a role, such as the three tanks: “do you trust more in the light to guard, the structure and workmanship of steel, or the strength of the wild?”) and 12 two-way questions for the closest pairs of finalists that no three-way question covers. Each lists its *finalists*, and it is eligible only when those specializations together hold at least m = 80% of the posterior probability (Table 10), so none is asked early, when nothing has narrowed, or out of place. Two of three finalists are enough, so a three-way question also serves when only the top two remain. Among the eligible questions the Oracle still picks the one with the largest information gain, which a question built to separate the finalists usually is.

Respondents are	Question pool	Mean questions	Credit earned	Exact specialization right	Runs that asked a tiebreaker
100% as consistent as assumed	74 questions, no tiebreakers	10.8	99.6%	99.3%	none
100% as consistent as assumed	all 103 questions	10.2	99.2%	98.9%	99%
70% as consistent as assumed	74 questions, no tiebreakers	13.2	96.7%	94.3%	none
70% as consistent as assumed	all 103 questions	11.1	96.0%	94.4%	99%
50% as consistent as assumed	74 questions, no tiebreakers	17.3	86.5%	80.6%	none
50% as consistent as assumed	all 103 questions	13.5	84.5%	79.2%	99%

Table 21. The pool with and without the tiebreakers, under the model. They save a fraction of a question and leave the accuracy where it was. A forced choice separates its finalists more sharply than a four-way question does (a mean of 11.0 nats between finalists, against 9.0 for the comparable within-class questions) because each answer is one of only two or three, and no weight was made heavier to get there.

8.11 Scaling the confidence by the number of questions asked

The probabilities of the model are most overconfident early. A person who is less consistent than the model assumes can look certain after three answers by chance, and that is the situation in which the stated confidence misleads most. So the confidence counts for more as more questions are asked. After n answers it is scaled by n / (n + k), with k = 1: that is 50% after one question, 83% after five, 91% after ten and 97% after thirty. The Oracle stops when the scaled confidence reaches the threshold, so a reading needs more raw certainty the sooner it wants to stop.

$$C_n = \frac{n}{n+k} R_n \qquad B_n = \frac{n}{n+k} \max_{m \le n} R_m$$

The confidence the Oracle **states** is B_n, the best certainty reached so far, scaled the same way. Because the best certainty never falls and n / (n + k) rises with every question, B_n rises with every question, even when a surprising answer lowers the current confidence C_n. The stopping rule tests C_n, not B_n, so a reading never stops on certainty it no longer has. Until C_n reaches the threshold the stated figure is kept under it: from 80% up (ten points under the threshold) the scale is compressed smoothly, by a hyperbolic tangent, toward a point one percentage point under the threshold, so the figure keeps rising without ever claiming a certainty the Oracle does not have. The class, specialization and role probabilities in the API's answers are the current ones, and can move either way, and a finished reading states C_n itself. The quiz screen shows only the Oracle's own percentage.

Respondents are	k	Mean questions	Median	Mean stated confidence	Credit earned	Exact specialization right
100% as consistent as assumed	0	5.5	5	94.7%	93.7%	91.6%
100% as consistent as assumed	0.3	6.4	5	92.8%	97.2%	96.1%
100% as consistent as assumed	1 (default)	10.2	10	90.6%	99.3%	99.0%
70% as consistent as assumed	0	6.9	6	94.7%	87.9%	83.2%
70% as consistent as assumed	0.3	8.1	7	92.7%	92.4%	89.6%
70% as consistent as assumed	1 (default)	11.2	10	89.9%	96.2%	94.4%
50% as consistent as assumed	0	8.9	7	94.2%	74.6%	66.9%
50% as consistent as assumed	0.3	10.5	9	92.2%	78.4%	70.0%
50% as consistent as assumed	1 (default)	13.7	11	89.0%	83.8%	77.9%

Table 22. The effect of k, under the model, for 800 simulated respondents per row. Scaling asks more questions and earns more credit. At k = 1 no reading stops before about ten questions (the scaling then needs a raw confidence of almost 1), the stated confidence is a little below what the readings earn for consistent respondents, and for inconsistent ones it comes closest to it.

The first question. Confidence mode opens with a question drawn at random from the personality questions (the thirty fixed-quiz questions and the class-separating ones), so that two readings do not always begin the same way. After that every question is chosen by information gain per unit of effort (section 8.12). The most informative first question, which the interface does not use, is always the same one.

8.12 Preferring simple questions, and settling close calls

Effort. Questions are not equally easy to answer. A single choice asks for one pick, a ranking for an order of four answers and a six-point split for an allocation. The Oracle therefore asks the question with the most information per unit of effort, IG(q) / e(q), where e is 1 for a single choice or a scale, $e_r = 1.5$ for a ranking and $e_a = 2.5$ for a six-point split. A hard question is still asked when it is far more informative than the simple ones, which is what happens when a reading needs a question that only a ranking or a split can supply.

$$q^{*} = \arg\max_{q} \ \frac{\mathrm{IG}(q)}{e(q)}$$

Settling close calls. When the frontrunners are two specializations of one class, or two that share a role such as Protection Paladin and Protection Warrior, the credits cap the confidence until the probability has settled on one of them: two equally likely tanks give R = 0.5 + 0.5 × 0.5 = 0.75, which no further question about the two of them can raise except the one that forces a choice. Without a rule the stated figure then creeps upward by a fraction of a point per question (n / (n + k) rises slowly after ten questions) while the Oracle keeps asking. So once n_t questions have been answered and a tiebreaker whose finalists together hold at least m of the probability has been answered, the Oracle stops and recommends the specialization that answer named, provided the scaled confidence in it is within a tenth of the threshold:

$$\text{decide when} \quad n \ge n_t \ \text{ and } \ \tfrac{n}{n+k} R_n(g) \ge \theta - 0.10, \qquad g = \text{the specialization named by an answered tiebreaker}$$

Of several answered tiebreakers the one that names the specialization the model finds most probable decides, and the decision does not depend on the order of the answers. A reading that is already confident of the scoring's own recommendation (C_n at or above the threshold) is not overruled. When a tiebreaker decides, the scoring's pick gives way: the result names the chosen specialization and says that a tiebreaker settled it, and the stated figure is the larger of the meter's value and the current confidence.

Respondents are	Rules	Mean questions	Six-point splits	Rankings	Exact specialization right	Credit earned	Settled by a tiebreaker	Figure stalls
100% as consistent as assumed	before	10.2	27.8%	14.5%	99.6%	99.8%	0%	2%
100% as consistent as assumed	now	10.2	2.6%	5.8%	99.4%	99.6%	12%	3%
70% as consistent as assumed	before	11.3	29.9%	15.6%	97.9%	98.5%	0%	14%
70% as consistent as assumed	now	11.3	1.8%	4.9%	95.2%	96.8%	34%	18%
50% as consistent as assumed	before	14.6	30.8%	18.0%	88.5%	91.6%	0%	43%
50% as consistent as assumed	now	13.7	1.7%	5.0%	78.8%	85.0%	57%	42%

Table 23. The Oracle before this change (every question one unit of effort, no decision) and now, under the model, for 800 simulated respondents per row. A stall is four or more questions in a row in which the stated figure rises by less than one point. Six-point splits and rankings fall to a small share of the questions asked at no cost in length. The decision ends 12%, 34% and 57% of the readings at the three levels of consistency. It costs exact-specialization accuracy when answers are scattered, because one tiebreaker answer then decides: 0.2, 2.6 and 9.8 points at the three levels. The share of readings whose figure stalls does not fall. Raising n_t or turning the decision off ($n_t = 0$) gives the accuracy back at the price of longer readings.

9 A worked example

A fixed example respondent taking the quiz in confidence mode: a person of type Druid Feral Combat who always gives the response the model finds most likely for that type. At each step the table shows which question the Oracle chose, the response, how much information it expected from it, and where the posterior stood after the answer.

n	Question	Type	Response	Expected gain (nats)	Recommended after answering	Confidence	H (nats)
1	Q49	choice	a	0.662	Warrior Protection	19.8%	2.610
2	Q57	choice	c	0.496	Druid Feral Combat	39.8%	2.195
3	Q33	choice	b	0.485	Druid Feral Combat	60.3%	1.250
4	Q06	choice	d	0.410	Druid Feral Combat	76.3%	0.396
5	Q88	choice	a	0.168	Druid Feral Combat	82.3%	0.116
6	Q84	choice	c	0.037	Druid Feral Combat	84.7%	0.057
7	Q96	choice	a	0.019	Druid Feral Combat	86.0%	0.025
8	Q75	choice	b	0.008	Druid Feral Combat	86.8%	0.007
9	Q34	ranking	b>a>c>d	0.002	Druid Feral Combat	87.2%	0.001
10	Q22	scale	10	0.000	Druid Feral Combat	90.9%	0.000

Table 24. The example run stops after 10 questions with 90.9% confidence in Druid Feral Combat. The five most probable types at the end:

Type	Probability
Druid Feral Combat	100.00%
Shaman Elemental Combat	0.00%

Type	Probability
Hunter Survival	0.00%
Druid Balance	0.00%
Warlock Destruction	0.00%

The deterministic result for the same 10 answers: Feral Combat Druid; top-two class gap G = 7.72; label “Strong lean” (margins 1.73 and 0.72).

10 Assumptions and limits

• **Scores are relative.** A class score is a sum of differences from the average answer pattern. “+13” does not mean 13% or 13 of anything. The nine class scores of a complete answer set sum to zero.

• **The weights are judgement.** Which answers point to which classes comes from playstyle lore and the project's own reading of Blizzard's class descriptions, and no data backs it. The twenty confidence-mode-only questions follow the same conventions. Research on WoW players has found little or no link between personality and the class they choose.

• **Balance is a property of the rules.** “Every class equally likely” holds when every response is equally likely. Real answers are not uniform, so real results will not be evenly spread, and nothing here claims they should be.

• **The confidence is exact inside a model, and the model is an assumption.** It says: people of a type answer by a logit choice with sharpness λ, independently, from a uniform start. Real answers are correlated and noisier or sharper than any one λ. A person who is a real blend of several classes is treated as noise around one of them, so the confidence overstates what can be known about them. The confidence is also an expected credit, not the probability of the exact specialization, which the API reports with it. Read “90% sure” as “the answers are as consistent with one specialization as this model requires”; no study of real respondents backs the figure.

• **Talent builds are drafts.** The builds shown with a result come from hand-assembled talent data dated November 2, 2026 and are unverified; they play no part in the selection.

• **Reproducibility.** Everything above is deterministic given the configuration; the simulations use fixed seeds. The browser and Python engines are tested to give identical results.

Appendix A The questions

Id	Type	Responses	Shortest quiz asking it (adaptive: confidence mode only)	Question
Q01	choice	4	short	You are permitted to spend one evening in an unfamiliar estate. Which room attracts you first?
Q02	choice	4	medium	Someone you care about has been treated unfairly. What is your immediate response?
Q17	scale	10	medium	When a group is lost, I'm the one who steps forward and decides.
Q03	allocation	84	medium	You arrive alone in an unfamiliar city with six hours to spare. How do you divide them among these places?
Q04	choice	4	medium	A mysterious event occurs. Which would you find most compelling?
Q25	pick two	6	long	You can carry only two of these on a long road. Which two do you take?
Q05	choice	4	long	An important plan has failed unexpectedly. How do you respond?
Q18	scale	10	medium	I plan every step before I begin.
Q06	choice	4	short	You are offered one unusual gift. Which would you accept?
Q07	ranking	24	long	Rank these kinds of weather from the one you would most like to the one you would least like.
Q19	scale	10	short	I will gladly gamble a lot for the chance of a big reward.
Q08	choice	4	long	If people remembered you for one quality, which would you choose?
Q28	choice	2	long	Which would you rather be?
Q09	allocation	84	short	You have six hours at a large festival. How do you divide them among these places?
Q20	scale	10	medium	I do my best work at a steady, unhurried pace.
Q10	choice	4	long	You may possess an extraordinary ability, provided you accept its limitation. Which do you choose?
Q26	ranking	24	medium	Four travelling companions ask to join you. Rank them from the one you would welcome most gladly to the one you would…
Q11	ranking	24	short	Rank these objects from the one you would most want to preserve for its beauty to the one you would least.
Q21	scale	10	long	I do my best when someone loyal is at my side.
Q12	choice	4	short	Which characteristic in other people frustrates you most?
Q29	choice	2	long	A stubborn locked gate stands between you and what you need. What do you do?
Q13	choice	4	short	If you disappeared from your ordinary life for a month, what would you most likely be doing?
Q22	scale	10	medium	I would rather learn from the wild than from books.
Q14	choice	4	medium	When two friends disagree, what position do you naturally assume?
Q27	pick two	6	short	A storm is rolling in. Which two things do you do?
Q15	allocation	84	long	After an exceptionally difficult day you have six hours to yourself. How do you spend them?
Q23	scale	10	short	I enjoy being noticed when I do something well.
Q16	choice	4	medium	Finally, choose the symbol that appeals to you most, without explaining why.
Q24	scale	10	short	I enjoy juggling many things at once and keeping them all going.
Q30	choice	2	long	Which fire would you rather tend?
Q31	choice	3	adaptive	You are given a rare talent and one season to master it. How do you spend the season?

Id	Type	Responses	Shortest quiz asking it (adaptive: confidence mode only)	Question
Q32	ranking	24	adaptive	Rank these ways of winning an argument from the one you would most like to use to the one you would least like.
Q33	choice	3	adaptive	A storm has torn through an old forest. What do you do?
Q34	ranking	24	adaptive	Rank these jobs from the one you would most like to the one you would least like.
Q35	choice	3	adaptive	You have a week alone in country you do not know. What do you want with you?
Q36	allocation	84	adaptive	You have six hours of daylight before you break camp. How do you divide them?
Q37	choice	3	adaptive	Someone you care about is in danger. What do you do?
Q38	ranking	24	adaptive	Rank these oaths from the one you would most like to keep to the one you would least like.
Q39	choice	3	adaptive	A friend is about to face something hard. How do you help?
Q40	allocation	84	adaptive	You have six hours in a temple. How do you divide them?
Q41	choice	3	adaptive	You need something from a guarded house. What is your plan?
Q42	ranking	24	adaptive	Rank these tricks of the trade from the one you would most like to master to the one you would least like.
Q43	choice	3	adaptive	A storm is about to ruin the village festival. What is your instinct?
Q44	ranking	24	adaptive	Rank these gifts from the spirits from the one you would most want to the one you would least want.
Q45	choice	3	adaptive	Someone has wronged you badly. What would satisfy you?
Q46	allocation	84	adaptive	You have six nights alone in a house that is said to be haunted. How do you divide them?
Q47	choice	3	adaptive	You have entered a long race. How do you prepare?
Q48	ranking	24	adaptive	Rank these ways of training from the one you would most like to the one you would least like.
Q49	choice	4	adaptive	A family gathering turns into an argument. Where do you find yourself?
Q50	scale	10	adaptive	When a conflict starts nearby, I like to stay out of arm's reach and see how it plays out.
Q51	choice	4	adaptive	A stranger knocks at your door in a storm and asks for shelter. What is your first thought?
Q52	choice	4	adaptive	Your group is stuck at a river with no bridge and night is coming. What do you suggest?
Q53	choice	4	adaptive	A friend asks for your honest advice about a risky plan. What do you say?
Q54	choice	4	adaptive	You find a sealed letter addressed to someone else. What do you do?
Q55	choice	4	adaptive	You are given the night watch over a sleeping camp. How do you spend the hours?
Q56	choice	4	adaptive	A rival asks you for a truce. What do you do?
Q57	choice	4	adaptive	You come into a large sum of money you did not expect. What do you do with it?
Q58	choice	4	adaptive	A young apprentice asks you to teach them one thing. What do you choose?
Q59	choice	4	adaptive	A contest offers a great prize to the winner. How do you enter?
Q60	choice	4	adaptive	A rumor spreads that you did something you did not do. How do you deal with it?
Q61	ranking	24	adaptive	Rank these ways to spend a free afternoon from the one you would most like to the one you would least like.

Id	Type	Responses	Shortest quiz asking it (adaptive: confidence mode only)	Question
Q62	ranking	24	adaptive	Rank these ways of crossing a wild country from the one you would most like to the one you would least like.
Q63	ranking	24	adaptive	Rank these gifts for a friend from the one you would most like to give to the one you would least like.
Q64	ranking	24	adaptive	Rank these places to live from the one you would most like to the one you would least like.
Q65	ranking	24	adaptive	Rank these ways of settling a dispute from the one you would most like to use to the one you would least like.
Q66	ranking	24	adaptive	Rank these roles in a traveling troupe from the one you would most like to play to the one you would least like.
Q67	ranking	24	adaptive	Rank these things you might hear said about you at the end of your life, from the one you would most like to the one ...
Q68	allocation	84	adaptive	You have six days before a hard journey begins. How do you divide them?
Q69	allocation	84	adaptive	You have six evenings in a festival week. How do you divide them?
Q70	allocation	84	adaptive	You have six hours to prepare for a trial that will decide your future. How do you divide them?
Q71	allocation	84	adaptive	You have six months to build a new life in a place you have never been. How do you divide the time?
Q72	allocation	84	adaptive	You have six nights at a crossroads inn. How do you divide them?
Q73	allocation	84	adaptive	A village needs a new shelter before winter, and you have six days. How do you divide your effort?
Q74	allocation	84	adaptive	You have six minutes to act in a crisis at a crowded market. How do you divide your attention?
Q75	choice	3	adaptive	As a child of the wild, which call do you answer?
Q76	choice	3	adaptive	As a hunter, what do you trust most when the hunt is on?
Q77	choice	3	adaptive	As a student of magic, what do you want your power to do?
Q78	choice	3	adaptive	As a follower of the light, do you prefer to seek retribution, stand in judgement, or spread forgiveness?
Q79	choice	3	adaptive	As a servant of the faith, how do you meet suffering?
Q80	choice	3	adaptive	As a master of the shadows, how do you end a quarrel?
Q81	choice	3	adaptive	As a speaker to the spirits, what do you ask of them?
Q82	choice	3	adaptive	As one who bargains with dark powers, what do you ask for?
Q83	choice	3	adaptive	As a soldier, what do you trust to carry you through?
Q84	choice	3	adaptive	As a protector, do you trust more in the light to guard, the structure and workmanship of steel, or the strength of t...
Q85	choice	3	adaptive	As a healer of the faithful, how do you keep them standing?
Q86	choice	3	adaptive	As a healer of the living, what do you trust to mend the hurt?
Q87	choice	3	adaptive	As a champion on the front line, how do you strike?
Q88	choice	3	adaptive	As a fighter who answers to instinct, what do you fight with?
Q89	choice	3	adaptive	As a caster who ends fights fast, what do you throw?
Q90	choice	3	adaptive	As a caster who plays the long game, what do you trust?
Q91	choice	3	adaptive	As a caster of patient study, where does your power come from?
Q92	choice	2	adaptive	As a defender of the weak, do you strike down the threat, or hold the line until the danger breaks on you?
Q93	choice	2	adaptive	In the thick of a brawl, what carries you: the spirits' strength in your weapon, or a rage that needs no help?
Q94	choice	2	adaptive	How do you master the dark: by looking into it, or by binding a servant to it?

Id	Type	Responses	Shortest quiz asking it (adaptive: confidence mode only)	Question
Q95	choice	2	adaptive	When trouble finds you, do you reach for a trap you set earlier, or draw steel and improvise?
Q96	choice	2	adaptive	Do you hunt as the beast, or beside it?
Q97	choice	2	adaptive	How do you win a fight: with a burst of flame, or a flurry of blows?
Q98	choice	2	adaptive	With a blade in each hand, what do you rely on: speed and wit, or rage and strength?
Q99	choice	2	adaptive	Where do you learn the wild: from the sky above you, or from a companion's eyes?
Q100	choice	2	adaptive	How do you win by patience: by understanding everything first, or by letting a curse do the work?
Q101	choice	2	adaptive	How do you protect those who depend on you: by mending them, or by standing in front of them?
Q102	choice	2	adaptive	When the fight comes, do you stand your ground, or choose the moment to strike?
Q103	choice	2	adaptive	How do you end an enemy: with one clean strike, or with a slow curse?

Appendix B Answer weights

Class weights always add up to 3 for an answer (usually 2 and 1; some are adjusted by a quarter point to equalize the classes); trait weights are 2 and 1; “direct” lists specialization weights (multiplied by M in P_s). For a scale question the two answers are the “agree” and “disagree” poles. 12 traits: Intuition (wild), Curiosity (scholar), Conviction (duty), Mystery (shadow), Protectiveness (guardian), Precision (focus), Compassion (healer), Intensity (power), Ingenuity (trickster), Spontaneity (instinct), Loyalty (bond), Independence (freedom).

Answer	Class weights	Trait weights	Direct specialization weights
Q01 A	Druid 2, Hunter 1	Intuition 2, Compassion 1	Druid Restoration 2
Q01 B	Mage 2, Shaman 1	Curiosity 2, Precision 1	Mage Frost 1
Q01 C	Priest 2, Paladin 1	Conviction 2, Protectiveness 1	Paladin Retribution 1
Q01 D	Warlock 2, Rogue 1	Mystery 2, Curiosity 1	Rogue Assassination 1, Warlock Demonology 1
Q02 A	Paladin 2, Warrior 1	Protectiveness 2, Conviction 1	none
Q02 B	Mage 2, Hunter 1	Precision 2, Curiosity 1	none
Q02 C	Priest 2, Druid 1	Compassion 2, Loyalty 1	Druid Restoration 1
Q02 D	Warlock 2, Shaman 1	Mystery 2, Intensity 1	none
Q17 agree	Warrior 1.5, Paladin 1.5	Protectiveness 2, Intensity 1	Paladin Protection 1, Warrior Protection 2
Q17 disagree	Hunter 2, Rogue 1	Independence 2, Precision 1	Hunter Marksmanship 2, Rogue Assassination 2
Q03 A	Hunter 2, Rogue 1	Ingenuity 2, Independence 1	none
Q03 B	Warrior 2, Shaman 1	Spontaneity 2, Loyalty 1	none
Q03 C	Druid 2, Priest 1	Intuition 2, Compassion 1	none
Q03 D	Mage 1.75, Warlock 1.25	Curiosity 2, Mystery 1	Warlock Demonology 2
Q04 A	Hunter 2, Druid 1	Intuition 2, Spontaneity 1	none
Q04 B	Shaman 2, Mage 1	Intensity 2, Intuition 1	Mage Fire 3
Q04 C	Paladin 2.5, Priest 0.5	Conviction 2, Precision 1	none
Q04 D	Rogue 2, Warlock 1	Mystery 2, Ingenuity 1	none
Q25 A	Paladin 2.25, Warrior 0.75	Protectiveness 2, Conviction 1	Paladin Holy 1, Paladin Protection 2, Warrior Arms 1
Q25 B	Druid 1.75, Shaman 1.25	Compassion 2, Intuition 1	Druid Balance 1, Druid Feral Combat 1, Druid Restoration 2, Shaman Restoration 1
Q25 C	Rogue 2, Warlock 1	Ingenuity 2, Mystery 1	Rogue Combat 1, Rogue Subtlety 2
Q25 D	Mage 1.5, Warlock 1.5	Curiosity 2, Precision 1	Warlock Affliction 1
Q05 A	Hunter 2.5, Rogue 0.5	Ingenuity 2, Spontaneity 1	none
Q05 B	Warrior 2.25, Paladin 0.75	Protectiveness 2, Intensity 1	none
Q05 C	Shaman 2.5, Druid 0.5	Intuition 2, Spontaneity 1	Druid Balance 1
Q05 D	Mage 1.5, Warlock 1.5	Curiosity 2, Precision 1	none
Q18 agree	Warlock 2, Mage 1	Precision 2, Curiosity 1	Mage Arcane 2, Mage Frost 2, Warlock Affliction 1
Q18 disagree	Shaman 2, Rogue 1	Spontaneity 2, Ingenuity 1	Rogue Combat 2, Shaman Enhancement 1
Q06 A	Hunter 2, Warlock 1	Loyalty 2, Intuition 1	none
Q06 B	Paladin 1.75, Priest 1.25	Conviction 2, Compassion 1	none
Q06 C	Mage 2, Rogue 1	Curiosity 2, Mystery 1	none
Q06 D	Druid 2, Shaman 1	Intuition 2, Independence 1	Druid Feral Combat 1
Q07 A	Mage 1.75, Priest 1.25	Precision 2, Protectiveness 1	Mage Frost 1
Q07 B	Druid 2, Shaman 1	Compassion 2, Intuition 1	Druid Balance 1
Q07 C	Warrior 2.5, Shaman 0.5	Intensity 2, Spontaneity 1	none
Q07 D	Rogue 1.75, Warlock 1.25	Mystery 2, Ingenuity 1	none
Q19 agree	Warlock 1.75, Mage 1.25	Intensity 2, Spontaneity 1	Mage Fire 3, Warlock Destruction 2
Q19 disagree	Priest 2, Paladin 1	Protectiveness 2, Precision 1	Paladin Holy 1, Paladin Protection 1, Priest Discipline 2

Answer	Class weights	Trait weights	Direct specialization weights
Q08 A	Paladin 2, Warrior 1	Protectiveness 2, Conviction 1	Paladin Holy 1
Q08 B	Mage 1.75, Rogue 1.25	Precision 2, Curiosity 1	none
Q08 C	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q08 D	Warlock 1.5, Hunter 1.5	Intensity 2, Independence 1	Hunter Marksmanship 1
Q28 A	Priest 1.5, Paladin 1.5	Compassion 2, Protectiveness 1	Paladin Holy 1, Priest Holy 2
Q28 B	Rogue 1.5, Warrior 1.5	Mystery 2, Spontaneity 1	Rogue Combat 2, Warrior Fury 1
Q09 A	Shaman 2, Warrior 1	Spontaneity 2, Intensity 1	Shaman Enhancement 2, Warrior Arms 1
Q09 B	Warlock 2, Priest 1	Mystery 2, Curiosity 1	Priest Shadow 3
Q09 C	Hunter 2, Paladin 1	Loyalty 2, Protectiveness 1	Hunter Beast Mastery 1
Q09 D	Hunter 1.75, Rogue 1.25	Ingenuity 2, Intuition 1	none
Q20 agree	Warlock 2, Druid 1	Precision 2, Intuition 1	Druid Balance 1, Warlock Affliction 2
Q20 disagree	Warrior 2.5, Shaman 0.5	Spontaneity 2, Intensity 1	Shaman Enhancement 1, Warrior Fury 2
Q10 A	Druid 2, Hunter 1	Intuition 2, Loyalty 1	none
Q10 B	Rogue 1.75, Hunter 1.25	Precision 2, Ingenuity 1	Rogue Assassination 3
Q10 C	Priest 2, Paladin 1	Compassion 2, Conviction 1	none
Q10 D	Warlock 1.75, Shaman 1.25	Mystery 2, Intensity 1	none
Q26 A	Hunter 2, Druid 1	Loyalty 2, Intuition 1	Druid Feral Combat 1, Druid Restoration 1, Hunter Beast Mastery 1
Q26 B	Rogue 2, Warlock 1	Ingenuity 2, Spontaneity 1	Rogue Combat 2, Warlock Demonology 1
Q26 C	Warrior 2, Paladin 1	Conviction 2, Protectiveness 1	Paladin Retribution 1, Warrior Arms 3, Warrior Protection 1
Q26 D	Priest 1.5, Shaman 1.5	Compassion 2, Loyalty 1	Priest Discipline 2, Shaman Restoration 1
Q11 A	Mage 2, Paladin 1	Precision 2, Curiosity 1	none
Q11 B	Druid 2.25, Warlock 0.75	Intuition 2, Mystery 1	Druid Balance 3
Q11 C	Warrior 2, Hunter 1	Protectiveness 2, Spontaneity 1	Warrior Arms 1
Q11 D	Rogue 2, Priest 1	Ingenuity 2, Compassion 1	none
Q21 agree	Hunter 2, Warlock 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2, Warlock Demonology 1
Q21 disagree	Rogue 1.5, Hunter 1.5	Independence 2, Mystery 1	Hunter Survival 1, Rogue Assassination 1, Rogue Combat 1, Rogue Subtlety 2
Q12 A	Paladin 2, Priest 1	Protectiveness 2, Conviction 1	Paladin Protection 1
Q12 B	Warrior 2, Shaman 1	Intensity 2, Spontaneity 1	none
Q12 C	Warlock 2, Mage 1	Curiosity 2, Precision 1	none
Q12 D	Rogue 2, Hunter 1	Ingenuity 2, Independence 1	Hunter Marksmanship 1, Rogue Combat 2
Q29 A	Mage 1.75, Rogue 1.25	Curiosity 2, Precision 1	Rogue Assassination 1
Q29 B	Warlock 2, Priest 1	Intensity 2, Mystery 1	Priest Shadow 3, Warlock Demonology 2
Q13 A	Shaman 2, Druid 1	Compassion 2, Intuition 1	Druid Restoration 1, Shaman Restoration 1
Q13 B	Warrior 2, Paladin 1	Intensity 2, Conviction 1	Paladin Protection 1, Paladin Retribution 1, Warrior Arms 1
Q13 C	Priest 2.25, Mage 0.75	Curiosity 2, Precision 1	none
Q13 D	Rogue 2, Warlock 1	Mystery 2, Independence 1	Rogue Assassination 1
Q22 agree	Druid 2, Shaman 1	Intuition 2, Spontaneity 1	Druid Feral Combat 2, Shaman Elemental Combat 1
Q22 disagree	Mage 2, Priest 1	Curiosity 2, Precision 1	Priest Discipline 1
Q14 A	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q14 B	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q14 C	Mage 2, Rogue 1	Precision 2, Curiosity 1	none
Q14 D	Warlock 2, Shaman 1	Mystery 2, Intensity 1	none
Q27 A	Shaman 2, Hunter 1	Intensity 2, Intuition 1	Shaman Elemental Combat 2

Answer	Class weights	Trait weights	Direct specialization weights
Q27 B	Paladin 2, Warrior 1	Protectiveness 2, Conviction 1	Paladin Holy 3, Warrior Protection 2
Q27 C	Hunter 2, Mage 1	Precision 2, Curiosity 1	Hunter Marksmanship 2, Mage Frost 1
Q27 D	Hunter 2, Druid 1	Ingenuity 2, Independence 1	Druid Balance 1, Druid Feral Combat 2, Hunter Survival 3
Q15 A	Hunter 2.5, Druid 0.5	Intuition 2, Independence 1	none
Q15 B	Shaman 2.5, Warrior 0.5	Loyalty 2, Spontaneity 1	none
Q15 C	Priest 2, Paladin 1	Compassion 2, Protectiveness 1	none
Q15 D	Mage 1.75, Warlock 1.25	Curiosity 2, Mystery 1	none
Q23 agree	Warrior 1.75, Mage 1.25	Intensity 2, Spontaneity 1	Mage Fire 3, Warrior Fury 2
Q23 disagree	Priest 2, Druid 1	Compassion 2, Protectiveness 1	Druid Restoration 2, Priest Discipline 1, Priest Holy 2
Q16 A	Rogue 2, Mage 1	Ingenuity 2, Precision 1	Rogue Assassination 1
Q16 B	Priest 2, Paladin 1	Compassion 2, Conviction 1	none
Q16 C	Druid 2.25, Hunter 0.75	Intuition 2, Loyalty 1	none
Q16 D	Shaman 2, Warlock 1	Intensity 2, Mystery 1	none
Q24 agree	Shaman 1.75, Warlock 1.25	Precision 2, Ingenuity 1	Shaman Restoration 2, Warlock Affliction 1, Warlock Demonology 1
Q24 disagree	Paladin 1.75, Warrior 1.25	Conviction 2, Precision 1	Paladin Retribution 2, Warrior Arms 2
Q30 A	Druid 2, Shaman 1	Compassion 2, Loyalty 1	Druid Restoration 2, Shaman Restoration 1
Q30 B	Paladin 2, Warrior 1	Conviction 2, Intensity 1	Paladin Retribution 2, Warrior Arms 1
Q31 A	Mage 2, Warlock 1	Curiosity 2, Precision 1	Mage Arcane 2
Q31 B	Mage 2, Warrior 1	Intensity 2, Spontaneity 1	Mage Fire 2
Q31 C	Mage 2, Priest 1	Precision 2, Protectiveness 1	Mage Frost 2
Q32 A	Mage 2, Warlock 1	Curiosity 2, Precision 1	Mage Arcane 2
Q32 B	Mage 2, Warrior 1	Intensity 2, Spontaneity 1	Mage Fire 2
Q32 C	Mage 2, Paladin 1	Precision 2, Protectiveness 1	Mage Frost 2
Q32 D	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	Rogue Subtlety 1
Q33 A	Druid 2, Mage 1	Curiosity 2, Intuition 1	Druid Balance 2
Q33 B	Druid 2, Hunter 1	Spontaneity 2, Independence 1	Druid Feral Combat 2
Q33 C	Druid 2, Shaman 1	Compassion 2, Loyalty 1	Druid Restoration 2, Shaman Restoration 1
Q34 A	Druid 2, Mage 1	Curiosity 2, Intuition 1	Druid Balance 2
Q34 B	Druid 2, Rogue 1	Spontaneity 2, Independence 1	Druid Feral Combat 2
Q34 C	Druid 2, Shaman 1	Compassion 2, Loyalty 1	Druid Restoration 2
Q34 D	Warrior 2, Paladin 1	Conviction 2, Protectiveness 1	none
Q35 A	Hunter 2, Druid 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2
Q35 B	Hunter 2, Rogue 1	Precision 2, Independence 1	Hunter Marksmanship 2
Q35 C	Hunter 2, Shaman 1	Ingenuity 2, Spontaneity 1	Hunter Survival 2
Q36 A	Hunter 2, Druid 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2
Q36 B	Hunter 2, Rogue 1	Precision 2, Independence 1	Hunter Marksmanship 2
Q36 C	Hunter 2, Shaman 1	Ingenuity 2, Spontaneity 1	Hunter Survival 2
Q36 D	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q37 A	Paladin 2, Priest 1	Compassion 2, Conviction 1	Paladin Holy 2
Q37 B	Paladin 2, Warrior 1	Protectiveness 2, Conviction 1	Paladin Protection 2, Warrior Protection 1
Q37 C	Paladin 2, Hunter 1	Conviction 2, Intensity 1	Paladin Retribution 2
Q38 A	Paladin 2, Priest 1	Compassion 2, Conviction 1	Paladin Holy 2

Answer	Class weights	Trait weights	Direct specialization weights
Q38 B	Paladin 2, Warrior 1	Protectiveness 2, Conviction 1	Paladin Protection 2
Q38 C	Paladin 2, Hunter 1	Conviction 2, Intensity 1	Paladin Retribution 2
Q38 D	Druid 2, Shaman 1	Intuition 2, Loyalty 1	none
Q39 A	Priest 2, Paladin 1	Precision 2, Compassion 1	Priest Discipline 2
Q39 B	Priest 2, Druid 1	Compassion 2, Loyalty 1	Priest Holy 2
Q39 C	Priest 2, Warlock 1	Mystery 2, Curiosity 1	Priest Shadow 2
Q40 A	Priest 2, Paladin 1	Precision 2, Compassion 1	Priest Discipline 2
Q40 B	Priest 2, Druid 1	Compassion 2, Loyalty 1	Priest Holy 2
Q40 C	Priest 2, Warlock 1	Mystery 2, Curiosity 1	Priest Shadow 2
Q40 D	Hunter 2, Warrior 1	Protectiveness 2, Spontaneity 1	none
Q41 A	Rogue 2, Mage 1	Precision 2, Mystery 1	Rogue Assassination 2
Q41 B	Rogue 2, Warrior 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q41 C	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	Rogue Subtlety 2
Q42 A	Rogue 2, Warlock 1	Precision 2, Mystery 1	Rogue Assassination 2
Q42 B	Rogue 2, Warrior 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q42 C	Rogue 2, Mage 1	Ingenuity 2, Mystery 1	Rogue Subtlety 2
Q42 D	Hunter 2, Druid 1	Loyalty 2, Intuition 1	none
Q43 A	Shaman 2, Mage 1	Intensity 2, Intuition 1	Shaman Elemental Combat 2
Q43 B	Shaman 2, Warrior 1	Spontaneity 2, Conviction 1	Shaman Enhancement 2
Q43 C	Shaman 2, Druid 1	Compassion 2, Intuition 1	Shaman Restoration 2, Druid Restoration 1
Q44 A	Shaman 2, Mage 1	Intensity 2, Intuition 1	Shaman Elemental Combat 2
Q44 B	Shaman 2, Warrior 1	Spontaneity 2, Conviction 1	Shaman Enhancement 2
Q44 C	Shaman 2, Priest 1	Compassion 2, Intuition 1	Shaman Restoration 2
Q44 D	Rogue 2, Druid 1	Mystery 2, Intuition 1	none
Q45 A	Warlock 2, Priest 1	Mystery 2, Precision 1	Warlock Affliction 2
Q45 B	Warlock 2, Hunter 1	Loyalty 2, Mystery 1	Warlock Demonology 2
Q45 C	Warlock 2, Mage 1	Intensity 2, Mystery 1	Warlock Destruction 2
Q46 A	Warlock 2, Priest 1	Mystery 2, Precision 1	Warlock Affliction 2
Q46 B	Warlock 2, Hunter 1	Loyalty 2, Mystery 1	Warlock Demonology 2
Q46 C	Warlock 2, Mage 1	Intensity 2, Mystery 1	Warlock Destruction 2
Q46 D	Mage 2, Priest 1	Curiosity 2, Conviction 1	none
Q47 A	Warrior 2, Rogue 1	Precision 2, Conviction 1	Warrior Arms 2
Q47 B	Warrior 2, Shaman 1	Intensity 2, Independence 1	Warrior Fury 2
Q47 C	Warrior 2, Paladin 1	Protectiveness 2, Conviction 1	Warrior Protection 2, Paladin Protection 1
Q48 A	Warrior 2, Rogue 1	Precision 2, Conviction 1	Warrior Arms 2
Q48 B	Warrior 2, Shaman 1	Intensity 2, Independence 1	Warrior Fury 2
Q48 C	Warrior 2, Paladin 1	Protectiveness 2, Conviction 1	Warrior Protection 2
Q48 D	Mage 2, Hunter 1	Curiosity 2, Precision 1	none
Q49 A	Warrior 2, Paladin 1	Protectiveness 2, Conviction 1	Warrior Protection 2, Paladin Protection 2, Druid Feral Combat 1
Q49 B	Priest 2, Druid 1	Compassion 2, Loyalty 1	Priest Discipline 1, Priest Holy 1, Paladin Holy 1, Druid Restoration 1, Shaman Restoration 1
Q49 C	Rogue 2, Warrior 1	Intensity 2, Spontaneity 1	Rogue Combat 1, Rogue Assassination 1, Warrior Fury 1, Warrior Arms 1, Paladin Retribution 1, Shaman Enhancement 1
Q49 D	Mage 2, Hunter 1	Precision 2, Independence 1	Mage Fire 1, Mage Arcane 1, Hunter Marksmanship 1, Warlock Destruction 1, Shaman Elemental Combat 1, Priest Shadow 1

Answer	Class weights	Trait weights	Direct specialization weights
Q50 agree	Hunter 2, Mage 1	Precision 2, Independence 1	Hunter Marksmanship 1, Hunter Beast Mastery 1, Mage Frost 1, Mage Arcane 1, Warlock Affliction 1, Druid Balance 1, Shaman Elemental Combat 1
Q50 disagree	Warrior 2, Rogue 1	Spontaneity 2, Intensity 1	Warrior Fury 1, Warrior Arms 1, Rogue Combat 1, Rogue Assassination 1, Paladin Retribution 1, Shaman Enhancement 1, Druid Feral Combat 1
Q51 A	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	none
Q51 B	Shaman 2, Druid 1	Loyalty 2, Spontaneity 1	none
Q51 C	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q51 D	Warlock 2, Mage 1	Mystery 2, Intensity 1	none
Q52 A	Hunter 2, Druid 1	Independence 2, Precision 1	none
Q52 B	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q52 C	Priest 2, Shaman 1	Compassion 2, Loyalty 1	none
Q52 D	Mage 2, Rogue 1	Curiosity 2, Precision 1	none
Q53 A	Druid 2, Hunter 1	Intuition 2, Compassion 1	none
Q53 B	Warlock 2, Rogue 1	Mystery 2, Intensity 1	none
Q53 C	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q53 D	Priest 2, Shaman 1	Compassion 2, Loyalty 1	none
Q54 A	Rogue 2, Warlock 1	Ingenuity 2, Mystery 1	none
Q54 B	Hunter 2, Druid 1	Independence 2, Precision 1	none
Q54 C	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q54 D	Mage 2, Priest 1	Curiosity 2, Precision 1	none
Q55 A	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q55 B	Shaman 2, Mage 1	Loyalty 2, Spontaneity 1	none
Q55 C	Hunter 2, Rogue 1	Independence 2, Precision 1	none
Q55 D	Druid 2, Priest 1	Intuition 2, Compassion 1	none
Q56 A	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	none
Q56 B	Shaman 2, Druid 1	Loyalty 2, Spontaneity 1	none
Q56 C	Warlock 2, Mage 1	Mystery 2, Intensity 1	none
Q56 D	Priest 2, Paladin 1	Compassion 2, Loyalty 1	none
Q57 A	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q57 B	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	none
Q57 C	Druid 2, Shaman 1	Intuition 2, Compassion 1	none
Q57 D	Warlock 2, Mage 1	Mystery 2, Intensity 1	none
Q58 A	Shaman 2, Hunter 1	Loyalty 2, Spontaneity 1	none
Q58 B	Mage 2, Warlock 1	Curiosity 2, Precision 1	none
Q58 C	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q58 D	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q59 A	Warlock 2, Shaman 1	Mystery 2, Intensity 1	none
Q59 B	Mage 2, Priest 1	Curiosity 2, Precision 1	none
Q59 C	Hunter 2, Rogue 1	Independence 2, Precision 1	none
Q59 D	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q60 A	Hunter 2, Druid 1	Independence 2, Precision 1	none
Q60 B	Rogue 2, Warlock 1	Ingenuity 2, Mystery 1	none
Q60 C	Shaman 2, Priest 1	Loyalty 2, Spontaneity 1	none
Q60 D	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q61 A	Mage 2, Rogue 1	Curiosity 2, Precision 1	none

Answer	Class weights	Trait weights	Direct specialization weights
Q61 B	Priest 2, Paladin 1	Compassion 2, Loyalty 1	none
Q61 C	Warrior 2, Hunter 1	Intensity 2, Spontaneity 1	none
Q61 D	Druid 2, Shaman 1	Intuition 2, Compassion 1	none
Q62 A	Druid 2, Priest 1	Intuition 2, Compassion 1	none
Q62 B	Rogue 2, Mage 1	Ingenuity 2, Mystery 1	none
Q62 C	Warlock 2, Shaman 1	Mystery 2, Intensity 1	none
Q62 D	Hunter 2, Warrior 1	Independence 2, Precision 1	none
Q63 A	Priest 2, Mage 1	Compassion 2, Loyalty 1	none
Q63 B	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q63 C	Warlock 2, Rogue 1	Mystery 2, Intensity 1	none
Q63 D	Shaman 2, Druid 1	Loyalty 2, Spontaneity 1	none
Q64 A	Druid 2, Priest 1	Intuition 2, Compassion 1	none
Q64 B	Rogue 2, Warlock 1	Ingenuity 2, Mystery 1	none
Q64 C	Shaman 2, Hunter 1	Loyalty 2, Spontaneity 1	none
Q64 D	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q65 A	Mage 2, Warlock 1	Curiosity 2, Precision 1	none
Q65 B	Priest 2, Paladin 1	Compassion 2, Loyalty 1	none
Q65 C	Hunter 2, Rogue 1	Independence 2, Precision 1	none
Q65 D	Warrior 2, Shaman 1	Intensity 2, Spontaneity 1	none
Q66 A	Shaman 2, Priest 1	Loyalty 2, Spontaneity 1	none
Q66 B	Warlock 2, Rogue 1	Mystery 2, Intensity 1	none
Q66 C	Mage 2, Paladin 1	Curiosity 2, Precision 1	none
Q66 D	Druid 2, Hunter 1	Intuition 2, Compassion 1	none
Q67 A	Hunter 2, Shaman 1	Independence 2, Precision 1	none
Q67 B	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q67 C	Rogue 2, Mage 1	Ingenuity 2, Mystery 1	none
Q67 D	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q68 A	Hunter 2, Druid 1	Independence 2, Precision 1	none
Q68 B	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q68 C	Mage 2, Priest 1	Curiosity 2, Precision 1	none
Q68 D	Warlock 2, Rogue 1	Mystery 2, Intensity 1	none
Q69 A	Shaman 2, Hunter 1	Loyalty 2, Spontaneity 1	none
Q69 B	Priest 2, Mage 1	Compassion 2, Loyalty 1	none
Q69 C	Warrior 2, Paladin 1	Intensity 2, Spontaneity 1	none
Q69 D	Druid 2, Rogue 1	Intuition 2, Compassion 1	none
Q70 A	Warlock 2, Shaman 1	Mystery 2, Intensity 1	none
Q70 B	Warrior 2, Hunter 1	Intensity 2, Spontaneity 1	none
Q70 C	Rogue 2, Mage 1	Ingenuity 2, Mystery 1	none
Q70 D	Paladin 2, Priest 1	Conviction 2, Protectiveness 1	none
Q71 A	Priest 2, Paladin 1	Compassion 2, Loyalty 1	none
Q71 B	Mage 2, Warlock 1	Curiosity 2, Precision 1	none
Q71 C	Hunter 2, Rogue 1	Independence 2, Precision 1	none
Q71 D	Druid 2, Shaman 1	Intuition 2, Compassion 1	none
Q72 A	Rogue 2, Warrior 1	Ingenuity 2, Mystery 1	none
Q72 B	Shaman 2, Priest 1	Loyalty 2, Spontaneity 1	none
Q72 C	Druid 2, Hunter 1	Intuition 2, Compassion 1	none
Q72 D	Warlock 2, Mage 1	Mystery 2, Intensity 1	none

Answer	Class weights	Trait weights	Direct specialization weights
Q73 A	Paladin 2, Priest 1	Conviction 2, Protectiveness 1	none
Q73 B	Shaman 2, Mage 1	Loyalty 2, Spontaneity 1	none
Q73 C	Warrior 2, Rogue 1	Intensity 2, Spontaneity 1	none
Q73 D	Hunter 2, Druid 1	Independence 2, Precision 1	none
Q74 A	Paladin 2, Warrior 1	Conviction 2, Protectiveness 1	none
Q74 B	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	none
Q74 C	Priest 2, Druid 1	Compassion 2, Loyalty 1	none
Q74 D	Mage 2, Warlock 1	Curiosity 2, Precision 1	none
Q75 A	Druid 2, Mage 1	Curiosity 2, Intuition 1	Druid Balance 2
Q75 B	Druid 2, Hunter 1	Intuition 2, Spontaneity 1	Druid Feral Combat 2
Q75 C	Druid 2, Shaman 1	Compassion 2, Loyalty 1	Druid Restoration 2
Q76 A	Hunter 2, Druid 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2
Q76 B	Hunter 2, Rogue 1	Precision 2, Independence 1	Hunter Marksmanship 2
Q76 C	Hunter 2, Warrior 1	Spontaneity 2, Ingenuity 1	Hunter Survival 2
Q77 A	Mage 2, Warlock 1	Curiosity 2, Precision 1	Mage Arcane 2
Q77 B	Mage 2, Warrior 1	Intensity 2, Spontaneity 1	Mage Fire 2
Q77 C	Mage 2, Priest 1	Precision 2, Protectiveness 1	Mage Frost 2
Q78 A	Paladin 2, Warrior 1	Conviction 2, Intensity 1	Paladin Retribution 2
Q78 B	Paladin 2, Druid 1	Protectiveness 2, Conviction 1	Paladin Protection 2
Q78 C	Paladin 2, Priest 1	Compassion 2, Conviction 1	Paladin Holy 2
Q79 A	Priest 2, Paladin 1	Precision 2, Compassion 1	Priest Discipline 2
Q79 B	Priest 2, Druid 1	Compassion 2, Loyalty 1	Priest Holy 2
Q79 C	Priest 2, Warlock 1	Mystery 2, Curiosity 1	Priest Shadow 2
Q80 A	Rogue 2, Mage 1	Precision 2, Mystery 1	Rogue Assassination 2
Q80 B	Rogue 2, Warrior 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q80 C	Rogue 2, Hunter 1	Ingenuity 2, Mystery 1	Rogue Subtlety 2
Q81 A	Shaman 2, Mage 1	Intensity 2, Intuition 1	Shaman Elemental Combat 2
Q81 B	Shaman 2, Warrior 1	Spontaneity 2, Conviction 1	Shaman Enhancement 2
Q81 C	Shaman 2, Druid 1	Compassion 2, Intuition 1	Shaman Restoration 2
Q82 A	Warlock 2, Priest 1	Mystery 2, Precision 1	Warlock Affliction 2
Q82 B	Warlock 2, Hunter 1	Loyalty 2, Mystery 1	Warlock Demonology 2
Q82 C	Warlock 2, Mage 1	Intensity 2, Mystery 1	Warlock Destruction 2
Q83 A	Warrior 2, Rogue 1	Precision 2, Conviction 1	Warrior Arms 2
Q83 B	Warrior 2, Shaman 1	Intensity 2, Spontaneity 1	Warrior Fury 2
Q83 C	Warrior 2, Paladin 1	Protectiveness 2, Conviction 1	Warrior Protection 2
Q84 A	Paladin 2, Priest 1	Protectiveness 2, Conviction 1	Paladin Protection 2
Q84 B	Warrior 2, Rogue 1	Protectiveness 2, Conviction 1	Warrior Protection 2
Q84 C	Druid 2, Hunter 1	Intuition 2, Spontaneity 1	Druid Feral Combat 2
Q85 A	Priest 2, Mage 1	Precision 2, Compassion 1	Priest Discipline 2
Q85 B	Priest 2, Druid 1	Compassion 2, Loyalty 1	Priest Holy 2
Q85 C	Paladin 2, Warrior 1	Compassion 2, Conviction 1	Paladin Holy 2
Q86 A	Druid 2, Hunter 1	Compassion 2, Loyalty 1	Druid Restoration 2
Q86 B	Shaman 2, Warrior 1	Compassion 2, Intuition 1	Shaman Restoration 2
Q86 C	Priest 2, Paladin 1	Compassion 2, Loyalty 1	Priest Holy 2
Q87 A	Paladin 2, Priest 1	Conviction 2, Intensity 1	Paladin Retribution 2

Answer	Class weights	Trait weights	Direct specialization weights
Q87 B	Warrior 2, Rogue 1	Precision 2, Conviction 1	Warrior Arms 2
Q87 C	Warrior 2, Shaman 1	Intensity 2, Spontaneity 1	Warrior Fury 2
Q88 A	Druid 2, Hunter 1	Intuition 2, Spontaneity 1	Druid Feral Combat 2
Q88 B	Shaman 2, Warrior 1	Spontaneity 2, Conviction 1	Shaman Enhancement 2
Q88 C	Rogue 2, Mage 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q89 A	Mage 2, Warrior 1	Intensity 2, Spontaneity 1	Mage Fire 2
Q89 B	Warlock 2, Rogue 1	Intensity 2, Mystery 1	Warlock Destruction 2
Q89 C	Shaman 2, Druid 1	Intensity 2, Intuition 1	Shaman Elemental Combat 2
Q90 A	Mage 2, Paladin 1	Precision 2, Protectiveness 1	Mage Frost 2
Q90 B	Warlock 2, Rogue 1	Mystery 2, Precision 1	Warlock Affliction 2
Q90 C	Priest 2, Shaman 1	Mystery 2, Curiosity 1	Priest Shadow 2
Q91 A	Mage 2, Shaman 1	Curiosity 2, Precision 1	Mage Arcane 2
Q91 B	Druid 2, Priest 1	Curiosity 2, Intuition 1	Druid Balance 2
Q91 C	Warlock 2, Hunter 1	Loyalty 2, Mystery 1	Warlock Demonology 2
Q92 A	Paladin 2, Warrior 1	Conviction 2, Intensity 1	Paladin Retribution 2
Q92 B	Warrior 2, Paladin 1	Protectiveness 2, Conviction 1	Warrior Protection 2
Q93 A	Shaman 2, Druid 1	Spontaneity 2, Conviction 1	Shaman Enhancement 2
Q93 B	Warrior 2, Rogue 1	Intensity 2, Spontaneity 1	Warrior Fury 2
Q94 A	Priest 2, Paladin 1	Mystery 2, Curiosity 1	Priest Shadow 2
Q94 B	Warlock 2, Hunter 1	Loyalty 2, Mystery 1	Warlock Demonology 2
Q95 A	Hunter 2, Shaman 1	Spontaneity 2, Ingenuity 1	Hunter Survival 2
Q95 B	Rogue 2, Warrior 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q96 A	Druid 2, Shaman 1	Intuition 2, Spontaneity 1	Druid Feral Combat 2
Q96 B	Hunter 2, Druid 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2
Q97 A	Mage 2, Warlock 1	Intensity 2, Spontaneity 1	Mage Fire 2
Q97 B	Warrior 2, Rogue 1	Intensity 2, Spontaneity 1	Warrior Fury 2
Q98 A	Rogue 2, Hunter 1	Spontaneity 2, Intensity 1	Rogue Combat 2
Q98 B	Warrior 2, Shaman 1	Intensity 2, Spontaneity 1	Warrior Fury 2
Q99 A	Druid 2, Mage 1	Curiosity 2, Intuition 1	Druid Balance 2
Q99 B	Hunter 2, Shaman 1	Loyalty 2, Intuition 1	Hunter Beast Mastery 2
Q100 A	Mage 2, Priest 1	Curiosity 2, Precision 1	Mage Arcane 2
Q100 B	Warlock 2, Rogue 1	Mystery 2, Precision 1	Warlock Affliction 2
Q101 A	Paladin 2, Priest 1	Compassion 2, Conviction 1	Paladin Holy 2
Q101 B	Warrior 2, Hunter 1	Protectiveness 2, Conviction 1	Warrior Protection 2
Q102 A	Paladin 2, Priest 1	Protectiveness 2, Conviction 1	Paladin Protection 2
Q102 B	Warrior 2, Rogue 1	Precision 2, Conviction 1	Warrior Arms 2
Q103 A	Rogue 2, Mage 1	Precision 2, Mystery 1	Rogue Assassination 2
Q103 B	Warlock 2, Priest 1	Mystery 2, Precision 1	Warlock Affliction 2
